Incorporated in 1995, FX Palo Alto Laboratory (FXPAL) is an expanding laboratory researching software and information technology for Fuji-Xerox Co., Ltd. Fuji-Xerox serves as the hub for the Xerox Group's operations in the fast-growing Asian and Southern Pacific regions. Located in Silicon Valley on the Xerox Palo Alto campus, FXPAL is the newest member of the Xerox global research community.

FXPAL's Mission

FXPAL plans to shape the "office of the future" and the "document of the future" and provide Fuji Xerox a digital information technology base for the 21st century. This goal is accomplished through:

- Research in core software technologies
- Work with selected universities to develop and transition information technologies
- Interaction with the US software industry to help tailor new products for FX systems and applications
